## Economic Growth & Agriculture

Agriculture sector requires less capital for its development thus it minimizes growth problem of foreign capital. ADVERTISEMENTS: In other words, where per capita real income is low, emphasis is being laid on agriculture and other primary industries.

## Role of Agriculture in the Economic Development of a Country

The issues are treated analytically.

## A Look at Agricultural Productivity Growth in the United States, 1948

Jul 29, 2021 USDA Economic Research Service using data compiled from the National Productivity data series, 1948-2017. Source of Foreign Exchange for the Country: Most of the developing countries of the world are exporters of primary products. These products contribute 60 to 70 per cent of their total export earning.

## Role of Agriculture in the Economic Development of a Country

Similarly, various under-developed countries of the world engaged in the process of economic development have by now learnt the limitations of putting over-emphasis on industrialisation as a means to attain higher per capita real income.

## Agriculture and Economic Growth

The development of agriculture, like that of other sectors, is determined to a large degree by the economic environment, especially public policies.

## Economic Growth & Agriculture

OUP is the world's largest university press with the widest global presence. Source of Food Supply: Agriculture is the basic source of food supply of all the countries of the world—whether underdeveloped, developing or even developed. Thus development of agriculture sector is also relevant on political and social grounds.

Create Effective Demand: The development of agricultural sector would tend to increase the purchasing power of agriculturists which will help the growth of the non-agricultural sector of the country. Generally, landless workers and marginal farmers are engaged in non-agricultural jobs like handicrafts, furniture, textiles, leather, metal work, processing industries, and in other service sectors.
