NIMH » Laboratory of Brain and Cognition (LBC)

Greengard was recognized for his discovery that dopamine and a number of other transmitters can alter the functional state of neuronal proteins, and also that such changes could be reversed by subsequent environmental signals. Thus, evaluating the need for mental health care among American Indians and Alaska Natives requires careful clinical inquiry that attends closely to culture.

Mental Health Reports And Publications

Financial inadequacies have resulted in four IHS service areas without child or adolescent mental health professionals.

Chapter 4 Mental Health Care for American Indians and Alaska Natives

The Aleuts share with American Indians a history of devastation as a result of diseases introduced by white men. Complementary Therapies
Several targeted studies suggest that in many cases American Indians and Alaska Natives use alternative therapies at rates that are equal to or greater than the rates for whites. Indeed, the data regarding reported child abuse in Native communities indicate that this phenomenon has increased 18 percent in the last 10 years.

Data and Publications

A previously mentioned study that examined the relationship of substance abuse and psychiatric disorders among family members also considered their use of mental health services. The authors conclude that recovery from depression is related to significant reductions in work disability and possibly related to reductions in health care costs.

Priority Area: Mental Health/Substance Abuse

Disruptive Behavioral Disorders Behavioral disorders involve a pattern of that last for at least 6 months and cause problems in school, at home, and in social situations. Traditional tribal and pan-Indian beliefs and practices continue to be influential, especially in help-seeking ; Csordas, 1999; ;. One perspective is that of the targets of stigma, i.

Mental Health By the Numbers

Personality disorders include antisocial personality disorder and borderline personality disorder. This Act, which intended to integrate American Indians into the rest of U. Altogether, more than 15 percent of the students qualified for a single diagnosis; 13 percent met criteria for multiple diagnoses.

US National and State

Presently, there are 34 such programs across 41 sites, independently operated through grants and contracts offered by the IHS. In the early 1900s, immigrants primarily came from Europe and Canada, while recent immigration is primarily from Asian and Latin American countries. Accessibility of Mental Health Services As noted earlier, the Federal Government has responsibility for providing health care to the members of over 500 federally recognized tribes through the Indian Health Service IHS.
