## Libya International Travel Information

Libya is a North African country located near the Mediterranean Sea that borders Egypt, Tunisia, Chad, Niger, Sudan, and Algeria. The purpose of this legislation was to ensure protection to forests and forest products, and also retain soil conditions, enhance water sources availability and utilization, and to prevent desertification. The populations of these species were greatly reduced by over-hunting and many are now endangered species, like the ostrich, addax, some species of gazelles and the cheetah.

## Rock

Important ecoregions for endemic species include the Mediterranean Dry Woodlands and Steppe and the Tibesti-Jebel Uweinat Montane Xeric Woodlands.

## Libya International Travel Information

As a tree, it can grow up to 5 meters tall.

## **Ecological Regions Of Libya**

What are these snake-bite and scorpion sting kits and what do they contain? What if your country had been repeatedly invaded by Arabs, if members of your family had been killed by Arab colonists, if you watched Arabs start two world wars, if you saw Arabs carve up other western nations for their friends? Oleander Along the northern Mediterranean coast of Libya you'll find the oleander *Nerium oleander* growing as a shrub or small tree. According to one should not touch the plant, as the latex the milky sap produced is very irritant, especially to the eyes: can become blind.
