Social Constructivism

The constructivist theory posits that knowledge can only exist within the human mind, and that it does not have to match any real world reality Driscoll, 2000. Educational Researcher, 24 7 , 5-12.

Expanding the Constructivist Metaphor: A Rhetorical Perspective on Literacy Research and Practice on JSTOR

So we need to ask: what is constructivism, what does it have to tell us that is new and relevant, and how do we apply it to our work? Most Constructivists take the constructing relation to be constitutive, that is, it is part of the very nature of constituted objects that they depend substantively on humans. Journal of Research in Science Teaching, 32, 143-156.

[PDF] Rhetorical reading strategies and the construction of meaning

In addition, this social interaction always occurs within a socio-cultural context, resulting in knowledge that is bound to a specific time and place Gergen, 1995; Vygotsky, 1978.

Constructivist Learning Theory

Early Child Development and Care, 187 3—4 , 554—567.

Constructivism is a theory of learning that has roots in both philosophy and psychology

And the raw materials cannot in turn be socially constructed without presupposing some even rawer materials out of which they are constructed, until eventually we reach a bedrock of brute physical phenomena independent of all representations. Forms of intellectual and ethical development in the college years: a scheme. They are Constructivist—rather than Realist—about vague objects or modal objects or ... objects because they take these entities to depend substantially either causally or constitutively on us for either their existence or nature.

Constructivism is a theory of learning that has roots in both philosophy and psychology

Boghossian 2006, 35 There are various answers Constructivists can give to this worry. Children use their emergent literacy skills as well as other symbol systems to make literal meanings from what is being communicated in the text by the author. A constructive view of learning science.

Meaning

The following, however, can serve as a good starting point definition for understanding constructivism: Constructivism: Some extant entities are constructed by us in that they depend substantively on us.

Constructivist Teaching in Primary Science

By paying attention to and highlighting the linguistic, visual and multimodal aspects of texts during emergent literacy experiences, educators can support children to engage with texts using multiple modes of communication. Some Constructivists for example, Goodman take words to be the basic building blocks of constructed entities.
