Weekend Roundup: Windows 11 Unveiled; A.I. Restores a Masterpiece

The 1642 painting last underwent significant restoration more than 40 years ago after it was slashed by a knife-wielding man and is starting to show blanching in parts of the canvas. Find out more about how we use your information in our and. The edges of the masterpiece were sliced away hundreds of years ago, and generations of art restorers have despaired over the loss.

And we can prove it. There are built-in widgets that can provide all kinds of information, including weather and maps, and tweaks to speed and performance over Windows 10. With the new digital additions — particularly a strip on the left of the painting that features two men and makes clear that a boy is looking over a balustrade — the main figures effectively are shifted to the right.

Not lost forever? How AI is restoring famous paintings.

The death toll remains at 6,427, with new COVID fatalities recorded since Sunday.

Not lost forever? How AI is restoring famous paintings.

Dibbits said the new printed additions are not intended to trick visitors into thinking the painting is bigger, but to give them a clear idea of what it was supposed to look like. Health Ministry figures show 75 new coronavirus cases have been recorded over the weekend, including 42 since midnight, following an outbreak at a school in northern Israel where several dozen students were infected.

However, Rembrandt, ever a unique artist, intended the painting's focal point to be just off-center. During the restoration project, the painting was encased in a specially designed glass room and studied in unprecedented detail from canvas to the final layer of varnish.
