The silent revolution; the industrial revolution in England as a source of cultural change, by John ...

When it comes to the economic development of Europe after the Industrial Revolution, most of the consequences were indeed positive. This process is complex and by no means sure to succeed. It changed from small rural villages into large urbane cities, domestic industries into big factories, and a change of transportation.

Industrial Revolution

Diamond and, in particular, gold mining industries required an enormous amount of inexpensive labour in order to be profitable. The technological revolution, and that sense of ever-quickenning change, began much earlier than the 18 th century and has continued all the way to the present day. The further mechanization of production led to the expulsion of part of the labor force from the capitalist factory, creating mass unemployment.

Industrial Revolution and Technology

It is also known as scientific as opposed to utopian socialism. A game played between London and Sheffield in 1866 was the first time a match time had already been determined 90 minutes. The economic historian Robert C.
