Ghassan Kanafani's *Men in the Sun*: Kanafani arranges his introductory chapters by the names of some of the characters, Abu Qais, Assad, Marwan each time telling of the character's individual life path which took him to the same smuggler as the others as well as, giving the reader the perceptions that these characters have had, and do have. He writes, There is a considerable need also in the natural language to use different viewpoints simultaneously, for because of our wish to formulate our thoughts as clearly as possible we have to rephrase them many times using different words. But, again, it was Sebeok who led the way with the summer institute at Bloomington and its research center.
