**The Project Gutenberg eBook of Pleistocene Soricidae from San Josecito Cave, Nuevo Leon, Mexico, by James S. Findley.**

RUSSELL Cueva de San Josecito in the province of Aramberri, near the town on Aramberri, Nuevo León, México, is at an elevation of approximately 7400 feet above sea level on the east-facing slope of the Sierra Madre Occidental in a limestone scarp. Each specimen has certain

Filesize: 26.710 MB

peculiarities but they resemble one another so closely that I regard all three as of the same species. Information about the Mission of Project Gutenberg-tm Project Gutenberg-tm is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers.

Drawing on stories from travelers and explorers, poets and painters, bureaucrats and activists, all of whom have been influenced by an environment shaped and permeated by water, Ball explores how the ubiquitous relationship of the Chinese people to water has made it an enduring metaphor for philosophical thought and artistic expression. Our catalogue includes more than 1 million books in several languages.

*Sorex trowbridgii* is similar to the fossils and to *S.*

**The Project Gutenberg eBook of Pleistocene Soricidae from San Josecito Cave, Nuevo Leon, Mexico, by James S. Findley.**

I can find no significant way in which the fossils differ from *S.* I hesitate to refer this fragment to any of the living species, although I would judge it to represent a form closer to the species *castanops* than to the *merriami* group *C. Heterogeomys onerosus*, front view of right, upper incisor.
