Appendix

Although findings consistently indicated that

nurse burnout was negatively related to job satisfaction, only two studies explored the relationship between nurse burnout and patient satisfaction. Describes the process of librarians and first-year writing instructors working together to develop curriculum, create and co-teach four modules, and assess the program. It cites, that while extremely popular, are both perhaps poorly implemented.

Annotated Bibliography

This article does a wonderful job of explaining how conflict can be seen as an opportunity to build stronger teams. We have a library of over 127,450 example documents you can use to help you understand college level academic writing.

Organizational behavior literature in health administration education. An indexed and annotated bibliography of books in use by graduate programs in hospital and health administration. (Book, 1972) [sdk.mavlink.io]

Contains full text for 708 journals dating back to 1908. CSSM Case Studies in Sport Management is a peer-reviewed journal focusing on the publication of teaching case studies related to the sport management discipline. Nature of virtual teams: a summary of their advantages and disadvantages.

Jerry Falwell Library

Academy Of Management Perspectives, 21 1 , 60-70. Perceived risk is also an interesting topic this article brought up, because the level of

perceived risk increased after staff were educated and made aware of what may be potential risks in their work environment.

Annotated Bibliography

Emotional intelligence abilities in oncology and palliative care. Calls for additional research on cognitive learning techniques to help students develop IL threshold concepts. US News and World Report.

ALL DATABASES

The search terms for MEDLINE ® were psychological stress, professional burnout, work stress, and occupational health. Although these findings do not clarify the mechanism for social support, they do indicate that coworkers and supervisors at all levels would be wise to consider the importance of reciprocal interpersonal exchanges that enhance security, mutual respect, and positive feelings. Some of these included lack of face-to-face contact, communication barriers, difficulty in aligning goals and obtaining clarity on team objectives, ensuring the availability of appropriate technological resources, and building trust among team members.
