Fifty years in both hemispheres : or, Reminiscences of the life of a former merchant : Nolte, Vincent, 1779

One senses that Nolte was a conscientious, but somewhat dull man, a man of rather limited vision--limited to currency, financial reports, and trade goods--who just happened to be in the right places at the right times. Therefore, you will see the original copyright references, library stamps as most of these works have been housed in our most important libraries around the world, and other notations in the work. Other whole chapters

are deadly dull recitations and this surely accounts for why the book isn't a historical standard of currency exchange or transfer deals he worked out, investments he made for his employers, and so forth.
