Role of Concrete Curing

This has been shown to be true whether the fluid deficit is incurred by prolonged exercise in a warm environment, by passive heat exposure or by diuretic treatment ;.

N Engl J Med 340, 1390—1397. Henry's law dictates that when temperature is constant, the solubility of the gas corresponds to it's partial pressure. Although the physiological consequences of dehydration due to the sweat loss that occurs during exercise have been the focus of much attention, there has been relatively little scientific interest in the effects of a fluid deficit incurred prior to exercise.

Effect of Hypohydration on Muscle Endurance, Strength, Anaerobic Power and Capacity and Vertical Jumping Ability: A Meta

Hypohydration reduces aerobic endurance, but its effects on muscle strength and endurance are not consistent and require further study.

Temperature Affects Batteries?

For this reason, when glycogen stores are depleted during exercise, glucose levels fall and fatigue sets in.
