Moreover, what is relevant is not only which opportunities are open to me each by themselves, hence in a piecemeal way, but rather which combinations or sets of potential functionings are open to me. This means that you can develop capability in specific areas such as stakeholder management and risk management but maturity is only achieved when you apply and integrate these throughout the life cycle. The basic idea would be to encourage or prescribe that the relevant group of people decide on the weights.

The Capability Approach and the Praxis of Development — the University of Bath's research portal

Although the capability approach, according to Robeyns, is committed to the former, it does not necessarily follow that collectives and social relations have no bearing on how those capabilities are realized. In this section, we explain some of the choices that need to or can be made when developing a capability theory.

At level 1, the specific goals set for the function or process are achieved. In addition to providing a conceptual framework for analysing the role of religion in development, the book provides numerous empirical examples drawn from the Christian and Islamic religious traditions. As a whole, this volume offers a unique and innovative scrutiny of a multifaceted capability-based analysis of development practice and public policy.

The Praxis approach

Capability goes from levels 0 to 3 and maturity from 1 to 5. Much of the critique that capability theorists have advanced against alternative normative frameworks such as Dworkinian resourcism, or the Rawlsian social primary goods approach, can be traced back to the objection that alternative approaches value particular means to well-being rather than the ends.
