Moreover, comparative expression analyses of *PYL-PP2C-SnRK2* genes between BaXi Jiao BX and Fen Jiao FJ revealed that *PYL-PP2C-SnRK2*-mediated ABA signaling might positively regulate banana fruit ripening and tolerance to cold, salt, and osmotic stresses. These four experiments consistently found that CV targets were named faster when preceded by CV primes than when they were preceded by CVG, CVN or unrelated primes, whereas CVG or CVN targets showed the reverse pattern.

Brunswick, Maine : Bowdoin College, Asian Studies Program, 1990. These historical events have been selected because they have: 1 received wide attention in public spheres, specifically in the major mass-media, at the time of occurrence, 2 presented the competing forms and contents of national identities, and 3 been supported by networks of intellectuals possessing significant power to support their viewpoints in public spheres at those moments.
