## Stonemasonry

Reason Number Five Stone can be a superior insulator.

## Stonemasonry

On a plinth nearby stands a of a wooden column, with decorative motifs digitally milled from a computer model using a CNC stone lathe, another prototype for a forthcoming project. Finally, a stone house doesn't take long to build.

## Stonemasonry

Un sourced material may be challenged and removed. But—at least in moderate climates—rock walls will actually help keep you comfortable; they slowly heat during the day, then radiate warmth through much of a cool evening. Longer spans may be accomplished using 6-inch rebar.

## Seven Reasons to Prefer Building With Stone

However, the final step to prepare for a stone wall is to place anchors in the fresh concrete to tie the footings and future walls together.

## Seven Reasons to Prefer Building With Stone

Learn how to build houses using slipforming.
