## **Transformation Educational Goals into Performance Indicators in Lithuanian and International Education Policy**

Effect of mental health varies in women and men. In these clinical studies, DD prevalence ranged from 4.

### **On Line Opinion**

The children in the study had been extensively screened at school age for maltreatment. Similar results were found in Norwegian naval cadets undergoing a POW simulation experience, and soldiers undertaking the grueling Combat Diver Qualification Course. The Week will start with a debate with representatives of the seven universities, which will be moderated by Dr Artūras Vasiliauskas.
