### Public Fishing Rights and the Landowner

Some fear the distributional consequences of recognizing transferable rights in a fishery or worry about the possible effect on local communities, particularly if fishery shares are bought out by larger companies. The problem with fisheries management runs deep. Incentives are different when property rights are insecure, as they are in the United States.

Each ITQ owner is entitled to harvest a percentage share of the TAC.

### Property Rights and Fishery Conservation

A clearer definition of UK fishing rights would also be desirable, as UK waters are becoming increasingly crowded. The structure of the UK POs also raises cause for concern in respect of competition law.
