Stop talking about race and IQ. Take it from someone who did.

Research also shows that this correlation persists within families meaning it is not the result of brain size being a proxy for socioeconomic status or any other variable

shared by members of the same family. Such has been demonstrated numerous times.

Statistics Show IQ Disparities Between Races. Here's What That Really Means

Studies using magnetic resonance imaging MRI find a correlation of brain size with IQ of about 0. Line 9 gives an IQ of 84 for South Asians and North Africans in their home country, from 37 studies in 17 countries.

Yes, let's talk about race and IQ

But this possibility is only worth mentioning as an example of something extremely unlikely.

History of the race and intelligence controversy

East Asians average higher on IQ tests than Whites, both in the U. Journalists and editors had the opposite opinion.

Race, Genes, and IQ

Also, Scott, I'm pretty sure Flynn gathered data from Estonia, not Astonia.

Race, Genes, and IQ

Turkheimer's findings make perfect sense once you recognize that IQ scores reflect some varying combination of differences in native ability and differences in opportunities. Suppose you give IQ tests to two children and they get the same score. Sir Arthur Lewis, the only black person to win a Nobel Prize in a science category: economy, in 1979.

Stop talking about race and IQ. Take it from someone who did.

Which means we can't provide any solutions. The scores of twins who are genetically identical, more or less are much more highly correlated than those of regular siblings who share only about half the same genes. .
