H.G. Wells's

With introduction by Mark R.

The Outline of History by H G Wells, First Edition

The text block with hint of age toning otherwise flawless.

H.G. Wells's

All the Traveler finds of any real use to him are an ancient mace and a box of matches with which to combat the Morlocks. Procreation is an avoidable thing for sane persons of even the most furious passions, and the men of the New Republic will hold that the procreation of children who, by the circumstances of their parentage, must be diseased bodily or mentally—I do not think it will be difficult for the medical science of the coming time to define such circumstances—is absolutely the most loathsome of all conceivable sins. The nineteenth century had, amongst other things, witnessed major breakthroughs in the fields of biology and geology.

H.G. Wells's

Today it is the infinitely more sophisticated Internet and World Wide Web which have enmeshed our globe in a fantastically intricate and diffused communications infrastructure. He also wishes to thank the following for their comments and suggestions: at the University of Illinois: Geof Bowker, Betsy Heame, Cheryl Malone, Andrew Pickering, the members of the Science, Technology, Information, and Medicine STIM Group and the members of the GSLIS Doctoral Proseminar, Michael Buckland at the University of California at Berkeley, and Mathew Skelton at Somerville College, Oxford University. His aim seems to be to demonstrate how his thinking over the long period of his productive intellectual life inevitably took the shape that it did.
