## Health Promot. Int.

We are grateful to Dr Kirstan Hawkins and Ben Rolfe of Options UK for training in the PEER methodology. It is not only the government who is diseased with begging for alms, but now many Zambians line up on street corners to ask for help.

## HIV/AIDS: a threat to the viability of the societies it attacks, Kybernetes

Improving the productivity and marketing of these crops promotes food and income security among rural households.

## International Fund for Agricultural Development

Convenience sampling technique was used because of time constraints.

## International Fund for Agricultural Development

Each of these processes would cause a biodiversity loss<sup>21</sup>, whose magnitude will depend on the type of crop grown, what it is replacing and the methods of cultivation and harvesting UN-Energy, 2007. We want this report to be used by UK and devolved governments to make improvements to law and policies, by local government to ensure services meet the needs of disabled people, and by disability groups to strengthen their case for change.

## Exploring the Roles of Agricultural Extension in Promoting Food Security in Kwazulu

In an attempt to address this problem, government adopted the Structural Adjustment Programme SAP in 1991, with the intention of creating

macro-economic stability in the economy.

### **Gender Inequalities in Rural Labor Markets**

Such socioeconomic status-related health disparities is present in every nation around the world, including developed regions. Dependency Syndrome : In as much as foreign aid is essential for the development of country we should begin to look elsewhere to become more economically independent. Poverty is often directly linked with poor health.

### **Exploring the Roles of Agricultural Extension in Promoting Food Security in Kwazulu**

The estimated prevalence of disability was higher in rural than in urban areas.

### **Greg Gondwe of Zambia: CAUSES OF POVERTY IN ZAMBIA**

This article analyses nine policy or strategy documents produced by the AU, covering the policy domains of education, health, employment and social protection that are crucial to the inclusion of disabled people in international development. In almost all countries, girls and women living in wealthier households experience lower levels of mortality and higher usage of health care services than those living in the poorer households. In this work researchers are focusing on various symmetric key encryption throughput and memory consumption with proposed high speed new algorithm which can be useful for the devices with low memory and processing capabilities.
