How Long After Giving Birth Should You Stop Bleeding? Here's Everything You Need To Know About Lochia

Too many new moms die from problems that could have been prevented. You may have a breast infection called mastitis.

Postpartum Blood Clots and Bleeding Signs, Treatment and Prevention

Secondary postpartum bleeding is that which occurs after the first day and up to six weeks after childbirth. Losing lots of blood quickly can cause a severe drop in your blood pressure. Save your maternity pads to show your midwife if possible.

Heavy Bleeding After Birth: What's Normal and What's Not

While effective, commercially available devices may be expensive for settings in which postpartum hemorrhage is most common.

Postpartum Thyroiditis; Causes, Symptoms & Treatments

When I came home from the hospital with my newborn son, I was happy to see that my bleeding had lightened considerably in the few days since I delivered.
