Cypress Lake Map Area, Saskatchewan. Environment Canada, Edmonton, 12 pp.

Characteristics of English Language Learners

The Alberta foothills is an amazing place to visit. Bentonite in the Fairport Member breaks into small chips or flakes upon drying, or when dug from fresh exposures. The lower bentonite bed lies 37.

Some characteristics of bentonite in Alberta (Book, 1966) [sdk.mavlink.io]

Thus, the Cedar Bluff Dam material came possibly from the upper part of the Fairport rather than from the Blue Hill Member. Unlike the surrounding plains of predominantly glacial origin, the dominant processes of landscape evolution have been fluvial dissection of the plateau and subsequent or contemporaneous mass wasting of the valley sides. From Castle Rock, Colorado, to southeastern Wyoming, as noted above, the Carlile passes into the Benton Formation westward from the Rocky Mountain foothills.
