Handbook of Gold Exploration and Evaluation

Men- struation had been regular though scantier since the operation. Inactivated vaccines and modified live virus vaccines are used for prevention of BHV-1 infections in cattle; subunit vaccines and marker vaccines are under investigation. I have intimated that for this condition you are not responsible in a professional sense, but are you sure that as citizens you are doing all in your power to remedy the situation? The conditions we are adopting for the importation of specified commodities are based on internationally accepted scientific literature, and are, in general, consistent with guidelines set out in the OIE's Terrestrial Animal Health Code.
