Right Living: An Anglo

With midwives, school and public health nurses, pharmacists, dentists, osteopathic doctors, optometrists, chiropractors, podiatrists, and others offering their services during the early decades of the twentieth century, health care outside of hospitals became as complex as that within. Right Living also offers insight into the world views and bedside practices of another time by examining the shaping and transmission of the English and continental tradition, the persistent interest in sexual relations and their consequences, and the changing uses of print as a commodity and as a product of specific, time-bound technologies.
