### The Pacific Northwest Home Gardener

Connecting the greenhouse to this insulated mass helps naturally even out temperature swings. In his keynote address at the 2015 International Trials Conference, Dr. Southeast Region Best overall performance — annual A.

### The Pacific Northwest Home Gardener

I would highly encourage you to take your time and provide your greenhouse with perfect insulation. Greenhouse Sheathing Covers Plastics Greenhouses can be closed in with glass, plastic panels, multiwall polycarbonate panels, and sheets of plastic.

### Solar Greenhouse Basics: Orientation

If the project is going to be fairly large scale then you will probably have either several large greenhouses or polytunnels and you may well then decide that automation is the way to go.

### The Pacific Northwest Home Gardener

Standard, or passive methods of thermal mass are most common, but have a couple limitations. For a lean-to it is essential that this is the case, to put one onto a wall in a direction that does not maximize the light is futile for almost all growing cases. Probably the best system for the rest of the flooring is to use gravel on top of an anti-weed membrane.
