Making the Transition from Middle School to High School

Functional math skills are those skills that students need to in the community, care for themselves, and make choices about their lives.

Middle School Level

Your child should set up a homework agenda and use it daily. I'll have to get her records from her middle school, and do my placement testing.

When Your Child Goes from Homeschooling to Public School

Starting the search early makes it more fun and less of a chore, and makes later, more formal college visits less daunting. My husband and I were never wasteful with money.

What curriculum are you using this school year?

One-to-one correspondence will also be helpful in such household tasks as setting the table and matching socks. These summer programs can be used as a stepping stone for many. I love using real-life examples when teaching my kids.

Rethinking Mathematics

The teachers will work you like they are your only teacher, but its understandable. Mastery provides great self-esteem, and mastery takes time and persistence, so we need to support that. Because You Dont Really Have Freedom You Have Too Learn To Manage Your Time Wisely.

Middle School Level

A meaningful piece of this policy requires revocation of authorization for a program if student achievement is not documented. The game includes game cards with math problems on them and players must find the matching answer on their card.
