In the process, she redefines the temperament of the musical Enlightenment as one characterized by urgent, volatile inquiries into the nature of the self. Le Guin's basic premise, as outlined in her introduction, is that one can attach meaning, in the form of a physical response, to an instrumental composition by applying images, movements, and texts from art, dance, and theater, as well as infusing these with theories, either from the eighteenth century or the present day. Superb survey of the structure of music from plainchant to musical procedures of the 1950s.
