## Animals in the Madagascar Rainforest

That meant tracking and observing groups of lemurs as the animals leaped from tree to tree through the forest, dined in the 65-foot-high canopies and dropped their undigested seeds at ground level. Archaeologists believe the island was discovered and colonized by Polynesians at about 400 AD.

## 8 Things You Need to Know About Lemurs!

Today, the largest lemur, the Indri, is tiny in comparison to the over-sized lemurs that once inhabited Madagascar. All over the world humans struggle to provide themselves with food, housing, and comfortable lives, while preserving the natural environment so that it can continue to sustain animals, plants, and other living things, including humans. The panther chameleons are also famous for their striking technicolor skin.

## 39 Extinct Animals: Madagascar, Rainforests etc. (with images)

This one barely fit in the trap! This not only puts lemurs in danger due to forest destruction, but it also makes them more likely to attempt to steal from farms and then get killed in the process. Scientific name Common name Classified Average size Conservation status References Daubentonia madagascariensis 1788, 2. They found that dispersal by lemurs dramatically increased the odds that seeds would take root and survive.

## The best places to see lemurs in Madagascar

Spiders include orb spiders, thorn spiders, trapdoor spiders, pelican spiders, wandering spiders, sac spiders, wolf spiders, tarantula spiders and many more. It is unique both in its habitat some dry and rocky areas of Madagascar and for its striped tail all other lemurs have solid-coloured tails. The lowland streaked tenrec is active both during the day and night and feeds primarily on insects.

## The best places to see lemurs in Madagascar

Maybe it was watching Zoboomafoo, a kids' nature show starring a wacky Coquere's sifaka---both a puppet and a real lemur. The only other

mammal to consistently demonstrate female dominance is the hyena. Prosimians like lemurs are insectivorous and herbivorous creatures.
