As chairman of committees on research and vaccine advisory for the , he oversaw the clinical trials of's vaccine.

## Viral and Rickettsial Infections of Animals

Those who go on safari—especially those walking in the bush, game hunters, and ecotourists to southern Africa—are at risk for African tick-bite fever. Travelers at most risk for epidemic typhus include those who work with large homeless populations or who visit, impoverished areas, refugee camps, and regions that have recently experienced war or natural disasters. Infections with various *Ehrlichia* and *Anaplasma* spp.

## Thomas Milton Rivers

Outbreaks of rickettsialpox most often occur after contact with infected peridomestic rodents and their mites, especially during natural die-offs or exterminations of infected rodents that cause the mites to seek out new hosts, including humans. Use of Experimental Animals References Chapter 4—The Multiplication of Viruses I. Most cases acquired in the United States are reported from Hawaii, California, and Texas.
