San Francisco County coronavirus cases: Tracking the outbreak

Report issues in connecting or using the network.

Apocalyptic photos and video show an orange sky over San Francisco, other cities as wildfires burn across Western states

Due to limited testing capacity, the information reported represents only a small sample of the likely total COVID-19 cases in San Francisco. It was captured in January 2019 as part of the removal of a homeless encampment in Oakland and does not show everyday conditions throughout the Bay Area.

A View of San Francisco 'Yesterday'?

We're already way behind just on basic infrastructure maintenance, let alone improvements to keep pace with globalization. You can see the smoke coming off the hill. In sum, we cannot destroy our economy over psuedo-science.

A View of San Francisco 'Yesterday'?

These heat anomalies have been increasing in frequency and duration, the last few years.

So was it hot in San Francisco yesterday or what? (home, living)

Current science and flawed models? Same in Seattle, btw; suddenly, in the last few years, heat waves in the 90's, and even 100's, have become a thing. That discussion will necessarily have to consider that we are not alone on the planet and thus are not the only emitters. Dealing with doctors, repair shops, car rental companies, police, and insurance companies is overwhelming, especially when someone is seriously injured.
