## Guidelines on the practice of ethics committees in medical research wi

These are known as NHMRC approved guidelines. A detailed index and a glossary will assist both professional and lay readers, as will the extensive references to published material from other bodies, including online resources.

## Guidelines on the practice of ethics committees in medical research wi

Research policy NHMRC is the key driver of health and medical research in Australia. Guidelines are eligible for approval if they are developed for use throughout Australia by a recognised health organisation such as a college, peak body, professional society, special interest group or government.

## [author unknown], Guidelines on the Practice of Ethics Committees in Medical Research with Human Participants

NHMRC will not approve guidelines developed, published or funded by industry groups, or by organisations whose main source of funding is derived from industry groups. The guidelines provide a comprehensive, concise, accessible and practical guide to research ethics. They are regularly reviewed and will be updated or withdrawn in light of important new evidence that may emerge.

## Guidelines on the practice of ethics committees in medical research wi

Although primarily concerned with ethical review in the UK, the guidelines are likely to be of value to those in other countries concerned with the ethical review of research.

## [author unknown], Guidelines on the Practice of Ethics Committees in Medical Research with Human Participants

We create pathways to a healthier future through our research funding, our health guidelines and the ethical standards we set and uphold. They are

developed by multidisciplinary committees or panels that follow a rigorous evidence-based approach. We create pathways to a healthier future through our research funding, our health guidelines and the ethical standards we set and uphold.

**Guidelines on the practice of ethics committees in medical research involving human subjects (1996 edition)**

Consultations are published on page. They are informed by the judgement of evidence by experts, and the views of consumers, community groups and other people affected by the guidelines. NHMRC guidelines are intended to promote health, prevent harm, encourage best practice and reduce waste.
