## Should Religion and Politic Be Kept Separated? Example

Then a few years ago, nine years ago, when he was 40 years old, he had a benign tumor in his left temporal lobe removed.

## Religion and Science: Conflict or Harmony?

The first concrete evidence that there was a connection between the temporal lobe and spiritual experience was made by a Canadian neurosurgeon named Wilder Penfield. And it is dishonest to tell people outside of your field that your opinion is the only possible opinion. We know that an anti-scientific approach does not work.

## Are science and Christianity at war?

Usually seizures are really horrible things. Our task is to invent ways to bring multiple perspectives together and have them interact constructively. Saying it again without providing evidence doesn't make it true.

## A and the definition of

That doesn't deny the value of observation of quantum mechanical fluctuations or anything else. Its discourse proceeds using standard rules of logic and derives evidence from a variety of empirically measurable sources, including scientific findings facts about the contents of various books, among other inputs.

## Reason and Democracy: Why Trumpists Hate Progressivism

I'm guessing that there's a conflict between your current views and omphalism, by which definition it must be incompatible with science. Institutional Failures In this paradigm, it is essential for these gatekeepers to operate properly and without bias or manipulation.

## **Opinion**

How can we distinguish between nondesign and design? That second hypothesis, the multiverse hypothesis, does require a certain amount of faith because those are not other parallel universes that we ever expect we would be able to observe. It is asked out of sincere ignorance and I would appreciate a non-snarky answer.
