US9703006B2

Transmissibility is a useful measure of connectivity. .

US9703006B2

INVESTIGATION OF THE ACCIDENT At 8:40 p. The fracture data can include information on natural fractures, hydraulically-induced fractures, or any other type of discontinuity in the subterranean region.

A microcomputer program utilizing a stratigraphic coding system for data entry into the National Coal Resources Data System

Another history match parameter may include transmissibility across faults.

US9703006B2

In some instances, a characteristic lithographic property of a subterranean layer includes the type of rock, the porosity of the rock, the fractured density of the rock, the hydrocarbon content of the rock, or other properties of the rock in the subterranean layer.

WO2015069299A1

. For example, changes like top structure or fault locations should preferably be made in the geologic model, with an extra step added to the workflow to develop the simulation model from this new geologic model.

WO2015069299A1

In exemplary embodiments, an optimization program is then used to control the history matching process or workflow. FIELD This section is intended to introduce various aspects of the art, which may be associated with exemplary embodiments of the present techniques.
