## Surface Plasmon Coupled Whispering Gallery Mode for Guided and Free

The properties of the waves guided by this structure depend strongly on the length of the holes in the direction of propagation and on their depth. Optical Printing of Electrodynamically Coupled Metallic Nanoparticle Arrays.

Consequently, if a surface can be designed with the property that the Kirchhoff approximation to the mean differential reflection coefficient of the light scattered from it vanishes for the scattering angle  $\theta$  s in the interval  $-\theta_m, \theta_m$ , say, all of the intensity of the light scattered into this range of scattering angles will be due to multiple-scattering processes. Capillary Force Driving Directional 1D Assembly of Patchy Colloidal Discs.
