

Herons, egrets and bitterns - their biology and conservation in Australia

CSIRO Publishing - Herons, egrets and bitterns: their biology and conservation in Australia

Description: This is the first book to deal exclusively with the Australian members of the Family Ardeidae. It is an easy-to-read account of their origins, classification and biology, and explains the features that distinguish them from other birds. This book covers the distribution and movements, feeding, breeding, population dynamics and conservation of the 14 Australian species. Also includes a chapter on the six species that are occasional visitors to the continent
