There has been a great temptation to reduce human ecology to a subset of a single discipline. Lewis Henry Morgan's field study of the Iroquois, published in 1851, was largely a springboard to his ethnology. Part I: Systematics of the Vascular Plants.

Books on Agricultural History Published in 1969 on JSTOR

Anthropologist John Bennett has described the theoretical perspective of cultural ecology clearly: A second meaning of the term ecology emphasizes adaptation or adaptive behavior. Qualitative researchers are called journalists or soft scientists.

Vol. 16, No. 52, May 1971 of Plains Anthropologist on JSTOR

If our goal extends beyond automated algorithm selection to the time-unconstrained development of genuine insights to inform algorithm design, then the problem-independent landscape analysis metrics, combined with problem-specific features, may provide the richest set of features from which to explore the constituents of problem difficulty. References to rapid appraisal, rapid rural assessment, rapid rural appraisal, participatory rural appraisal, and the acronym RAP have been widely used in the literature to identify different rapid qualitative research methods.
