I am now working with several introduced seedlings from tetra RFK. Both Mount Doom and Ziggy Played Guitar are favorites, and they have both been very popular. However, Stout was able to approach the act of hybridizing from a systematic, information-gathering orientation that allowed him to document his work and leave us a legacy, both of genetic materials the plants he introduced and all their many, many descendants and the record of what he did.

Daylilies by Stout a B

Another important area of my work, which was ongoing throughout the other research on phenotype genetics, was research into immunogenetics heritable disease resistance. The majority of our daylilies were either ordered from the Gilbert H.

The scapes are very tall and hold up wonderfully.

Daylilies by Stout a B

In the very beginning, the program of the Wild family was the only program I really knew about. I have been exposed to daylilies throughout my entire life. This in turn lead to a revolution in actively making hybrids between different species within genus usually - though wider crosses have

been known to be made successfully.

Daylily Breeder Blog: 2019 Interview for Paul Lewis

Haliner gave me the direction and basic data to get started. Some Dates of Significance From the Beginning. The flowers are about five inches in spread; the segments are fairly broad, somewhat stiffly spreading-recurving, and of good texture.
