Catalog Record: Mined land subsidence impacts on farmland...

A hierarchical framework for stream habitat classification: Viewing streams in a watershed context.

Potential fly

Transactions of the CSAE 27, 65—71 2011. USDA, Agricultural Research Service, Fort Collins, CO, DRAFT. Erosion of cut banks and fill slopes is a severe problem where culverts are in place.

Disaster and Emergency Planning for Preparedness, Response, and Recovery

Thus the runoff from outside the subsidence areas is an important source of water recharge in the HCMSSs. In the early stage 1990—99 , studies mainly focus on the application of agricultural chemicals, pollutant emissions and their concentration in various environmental media.

Disaster and Emergency Planning for Preparedness, Response, and Recovery

Obviously, changes in both discharge and sediment load may lead to conflicting responses, so it is not easy to precisely predict channel changes and the associated effects on habitat. The emphasis in lake studies is different from studies of the stream environment.

A Biophysical and Socioeconomic Review of the Volta Delta, Ghana

Although the Volta delta is relatively smaller in size, it is undergoing changes similar to other deltas globally. Effects of reducing sand on a trout population.

Recent Environmental Impact Assessment Review Articles

This can result in the death of riparian vegetation, which may rely on shallow ground water for the dry seasons of the year. Decisions and communications need to be recorded.
