2013/International Fund for Agricultural Development (IFAD), Volume I

This being said, the ARRI also states that a significant proportion of projects 53% are only moderately satisfactory and none are highly satisfactory. The organisation takes a market-oriented approach to rural development and its projects seek to incorporate smallholders into global value chain development.

Prof. dr. ir. Wim van der Putten

KPI 4: Focus on cross-cutting priorities Finding 4: IFAD is considered fairly strong in mainstreaming gender equality, environment, and food security and nutrition. Biological Invasions, 16 12 , 2551-2561. However, changes in the IFAD9 Replenishment Period are likely to improve these practices.

Electric vehicles: To what extent are environmentally friendly and cost effective?

One of its most significant changes involves moving to a direct supervision model and increasing its formal country presence in 40 borrowing countries. In addition, the Climate Change Results Implementation Framework commits IFAD to mainstreaming environment and climate change activities by requiring all new COSOPs to systematically and appropriately reflect climate and environment issues.

Lifetime impact of achondroplasia: Current evidence and perspectives on the natural history

History of the cattle industry in the southwest. Applied Soil Ecology, 10 1-2 , 1-10. Caregiving experiences of family members of persons with dementia in south India.

Lifetime impact of achondroplasia: Current evidence and perspectives on the natural history

Of the seven projects covered, four were under implementation during the evaluation and two of these are still active: the Rural Finance Support Programme PAFIR and the Agricultural Support Programme PRONEA. According to a Project Completion Digest from 2009, pastoral

communities supported by the project benefitted strongly from water supply projects which contributed to minimising the rate of mobility and in improving the livelihood of the intended beneficiaries. Like other development organisations IFAD has committed to supporting the achievement of the MDGs.

Lifetime impact of achondroplasia: Current evidence and perspectives on the natural history

IFAD has stepped up efforts to improve the integration of sustainable practices across its activities and recently created the Environment and Climate Division ECD to co-ordinate these efforts.

Publications

De Young, Charles Doughty, Robin W. IFAD has not yet introduced a system of time recording and cost accounting, which is essential to reliably capture the full costs of all major business activities performed by staff. *Journal of Ecology*, 101 5 , 1093-1102.
