Is Fusion Power Within Our Grasp?

The scope: The report, which is meant to catch the eye of leaders in the DOE, Congress, and the White House, details the needs of the fusion and plasma program identified by a FESAC subcommittee—the DOE Fusion Energy Sciences Advisory Committee for Long Range Planning—with the help of the fusion research community. Fusion: Science, Politics, and the Invention of a New Energy Source. MITEI participation Commonwealth Fusion Systems is a private company and will join the MITEI as part of a new university-industry partnership built to carry out this plan.

Conferences

The committee reported directly to Johnson and provided recommendations on the overall coordination of fusion research.

Project Sherwood: Orientation Lectures presented at Oak Ridge National Laboratory, November

The War Zone's on the strange circumstances surrounding these patents underlined that there were indeed some type of physical experiments conducted related to them, even if very limited.

Project Sherwood: Orientation Lectures presented at Oak Ridge National Laboratory, November

Gatlinburg then was a tiny town and the conference was held in a hotel, which was hard pressed to find a slide projector.
