## Center for HIV/AIDS Research, Education and Service (UF CARES)

UF CARES collaborates with researchers from the University of Florida as well as other academic institutions. Having high cholesterol levels for long periods of time during childhood greatly increases the risk for cardiovascular disease later in life.

**Pediatric and Adolescent AIDS: Research Findings from the Social Sciences: 9780803939837: Medicine & Health Science Books @ [sdk.mavlink.io](http://sdk.mavlink.io)**

A new study shows that young people with first episode psychosis have a much higher death rate than previously thought.

## Center for HIV/AIDS Research, Education and Service (UF CARES)

CALIFORNIA University of California at Los Angeles School of Medicine Yvonne J.

## Research Advances in Pediatric, Adolescent, & Maternal HIV/AIDS

Antiretroviral drug regimen changes were made for 27 percent of the children in the study with high cholesterol, and only a few included drug changes that were shown to reduce cholesterol in clinical trials of HIV-infected adults, a situation that could reflect the fewer antiretroviral drug choices available for HIV-infected children compared to adults.

**Pediatric and Adolescent AIDS: Research Findings from the Social Sciences: 9780803939837: Medicine & Health Science Books @**

The center's research team is composed of highly-trained and experienced individuals who are committed to improving the health of HIV infected including pregnant women, adults, adolescents and children living with HIV and other infectious diseases by offering research studies that are designed to increase our understanding of these diseases and develop better treatment options. Each participant and one of his or her parents will be interviewed separately and together.

### **Program in Pediatric Health Equity Research**

After exploring the medical and epidemiological aspects of the disease, the authors discuss AIDS knowledge and attitudes, sexual behaviour and intravenous drug use among adolescents.
