Chapter 1

Concurrently, recovery from disaster has occasionally become the opportunity to impose ideologies, as was the case with the introduction of Islamic Sharia law, after both the 2004 tsunami in Banda Aceh and the 2009 Padang earthquake in Indonesia.

There is a welfare function in recovery from disaster, and this begs the question of what welfare should involve.

Technology Planning

From Incident to Catastrophe: The Range of Impacts Most civil contingencies are small enough to be resolved adequately without qualitative changes in daily management procedures or quantitative changes in the availability of resources. VISITOR ATTRACTIONS — the success of a destination depends not only on its power to attract visitors but also on its ability to maintain them. Each of these is associated with a threshold of capability, which is determined by the availability of trained personnel, expertise, equipment, supplies, communications, vehicles, and buildings.

Visual assessments of the distributions can be limiting; it is difficult to draw conclusions based solely on them. Project 79864, for example, has a moderate cost but affects the greatest number of carless households among all 19 projects. The emergency plan therefore needs to be tested under

hypothetical conditions.

A Systems View of Planning

Planners must also be aware of zoning laws, which are another way cities control the physical development of land.
