Arqueología de la Sierra de San Francisco: dos décadas de investigación del fenómeno Gran Mural. Acorns and piñon nuts were staples, with fish second in importance.

The ethnobotany of deergrass, *Muhlenbergia rigens* (Poaceae): Its uses and fire management by California Indian tribes

Abstract: This collection of 5 documents is about the Uto-Aztecan speaking Tubatulabal whose homeland is centered on the confluence of the Kern and South Fork Kern rivers, and adjacent Greenhorn Mountains of California. If any one thing served as a specialized food and required specialized techniques, it was the acorn, which became the center of a very interesting complex.

Mojave Desert Native American Culture

During winter, circular domed brush- and mud-covered one-family houses were used.
