

Study of the possibilities of parental involvement in primary schools in Botswana

University of Birmingham - Physical education, school physical activity, school sports and academic performance

Table 2 Summary of questionnaire key findings	
Parental profile	
Respondents who were parents	94.4%
Age range	31-40
Schooling to grade 12 completion	
Grade 1 parents	84.4%
Grade 3 parents	56.4%
Post-secondary training or education	24.0%
Employment	
Clerical	16.6%
Managerial	13.4%
Professional	37.6%
Did not specify	13.1%
Other (work at home)	---
Language spoken before age 6	
Northern Sotho and Tswana	48.1%
Language used with grandparents	
Northern Sotho	21.2%
Tswana	13.3%
Report multilingualism	100.0%
Speak English well	24.0%
Speak English every day	89.5%
School choice: location	
Close to workplace	60.3%
Close to home	46.5%
No other choice	14.0%
School choice: reputation	
Firm discipline	95.3%
Sports	53.1%
School choice: Medium of instruction	
Want English as primary language of instruction	95.0%
Want English only	47.0%
Want mother tongue at least 1 hour per day (grade 1 & 2 parents)	43.3%
Want mother tongue at least 1 hour per day (grade 3 parents)	36.0%

A Better Education for All During—and After—the COVID

Edited by: Binkhorst RA, Kemper HCG, Saris WHM. Protective and risk factors in health-enhancing behavior among adolescents in China and the United States: does social context matter? Raudsepp L: The relationship between socio-economic status, parental support and adolescent physical activity.

Physical education, school physical activity, school sports and academic performance

Indeed, only 1 of the 37 studies identified included this age group. Lower-income families might not have access to computers, video conferencing and online learning platforms.

The extent of child sexual abuse in Botswana: hidden in plain sight

Students were informed of the study in both Setswana and English, and their assent was demonstrated through voluntary participation in the survey. After collecting student, parent, and teacher phone numbers, the NGO devised two strategies to deliver educational support. Our study found that adolescents at high peer models risk were 1.

Online schools: Student performance often falls behind regular schools

Exercise and learning mechanisms Hippocampal LTP is the most credible physiological explanation for learning and memory in mammals, including humans.

Involving parents from the start: Formative evaluation for a large RCT with Botswana Junior Secondary School students

I will not spread rumours about my own child. Within middle to upper middle SES categories, a cross-sectional study of suburban high school

seniors 52 girls and 37 boys found that the more active group had higher GPA.

A historic shock to parental engagement in education: Parent perspectives in Botswana during COVID

These relationships have been the subject of extensive discussion between advocates and skeptics of PE, school PA and school sports programmes. A main takeaway: Students tend to receive higher grades in online courses.

The extent of child sexual abuse in Botswana: hidden in plain sight

Conclusions Alcohol and illicit drug use is prevalent among secondary school students in Botswana.
