### Mechanism of Action of 2

Severe cutaneous injury, with necrosis and spreading vesication, is seen with exposure to high doses over a period of minutes. Hassall, The Chemistry of Pesticides Deerfield Beach, Florida: Verlag Chemie, 1982 p.

### Dusty Agents and the Iraqi Chemical Weapons Arsenal

Molecular Structure and Antitumour Activity of Alkylating Agents. United Nations inspections of Iraqi military establishments after victory in the Gulf War revealed biological, chemical and nascent nuclear weapon capabilities. Observations on the interaction of sulfur mustard with cytochrome P450.

### The effect of mustard gas on the biological activity of soil

These epoxides react directly with DNA, producing mutagenic adducts. An avian ricin antitoxin has been developed for use in animals. Protein loading was checked by stripping and re-probing the membranes with  $\beta$ -actin antibody.

### Mechanism of Action of 2

Airway collapse occurs distal to areas of sloughed respiratory epithelium.

### A Study of Comparative Chemical and Biological Activities of Alkylating Agents1

Reports of the specific experimental protocols were not always easy to obtain; in some cases, reports were not available or were obtained as the study was almost complete. Decontamination Decontamination describes the removal or neutralization of CBWs to limit human exposure.
