### Endothelium

Perlman classifies them as backward-looking to the recent past.

### A Unifying Theory of Biological Function

The Y-axis represents the percentage of women and men in the general population.

### Twinning in humans: maternal heterogeneity in reproduction and survival

Alterations in the adult, after critical periods, may be absent and increases may still be observable following stimulation. Autoradiographic localization of relaxin binding sites in rat brain.

### A Unifying Theory of Biological Function

Glutamine, the precursor to glutamate, has been reported to be deregulated in autistic brain tissue and blood samples ; ; ; ; but see also. The Intense World Theory also predicts enhanced perception of sensory fragments, focus on details and piece-meal perception and a deficit in complex and more holistic processing and therefore encompasses these different theories.
