## Visitor Information

Both government and science became suspect. SAFS staff does not offer individual guided tours of our facilities. At that time Japan had the largest fish catch of any nation, and had developed the best equipment and organizations for distant-water fishing of any nation.

## Introduction to Fisheries

We have developed our sciences, our professional values, our social awareness, and an educational philosophy. The conclusion was that even with just trying to change one factor, they could not predict the sequence of changes in the biological populations in that small lake. One of the most significant steps toward environmental management came in the United States with the National Environmental Policy Act NEPA of 1969.

## Visitor Information

One might expect that general revenues rather than special revenues would be used for an activity popular among about 20 percent of our people, and that special services to less than 1 percent of our people would require some special taxes on them. The book is intended to be used by students and those who want to broaden their knowledge on the science of fishery.

## Historical Development of Fisheries Science and Management

Several regional committees or commissions were subsequently established which emphasized applied research and integrated scientific investigation with fishery development.

## Introduction to Fisheries

Canada also, during the same period, established a Board of Management of the Marine Biological Station in 1898 for a laboratory on a barge in the Gulf of St. Others pointed out the failure of governments to deal with resource issues in a comprehensive way White, 1958.

## Brief Introduction to Fisheries

Restrictions on commercial fishing which divide the catch among all who want to fish satisfy the public ideals of equal access and fairness but conflict directly with the business needs of the fishermen.

### **Introduction to the Fishery Sciences**

So much for some of the current challenges.

### **Introduction to Fisheries**

Thompson on halibut and Fraser River salmon, and with the work of freshwater scientists in northern America associated with the Biological Board of Canada, the Tennessee Valley Authority, the States of California, Michigan, New York, and Washington, and the U.
