Advances in Fertility Technology Could Change Everything

Her body had taken to all fertilized eggs and then she gave birth to 8 children. Of his 11 patients, , and there were no more ongoing pregnancies.

Advances in Fertility Technology Could Change Everything

That embryo, when fertilized into the mother, has more of a connection with the mother who bares the baby than the donors.

Girl or Boy? As Fertility Technology Advances, So Does an Ethical Debate

This is all very exciting to me as a prospective grandmother. This reality is bringing together strange bedfellows, be it liberal feminists and conservative Catholics in Europe, as The Atlantic , or here at home, where a Catholic like myself finds myself ardently concurring with the likes of Gloria Steinem

The Past, Present, and Future of Baby

My husband was in agreement and we both have wished we could have had a daughter but knew it would likely not happen.

bars

CRISPR designer babies are created by modifying DNA fragments to prevent and correct disease-causing genetic errors.

Debate Issue: IVF Debate

In countless other cases, surrogates whose eggs were used have changed their minds about giving up the child, only to be told they must relinquish the baby which is biologically theirs. Children who were born by using any assisted reproductive technology, are know to have higher risks of having major birth defects or low body weight then those who were naturally conceived children, 9% higher chance for IVF children than 4%

chance for naturally conceived children fertility care.

Designer Babies, PGD, Genetically Modified Babies, GM Baby

I cannot but look at sex selection of babies before pregnancies as an extension. Of course, just because we're not yet able to undo that fertility decline doesn't mean no one is trying. One woman actually had given birth to 8 children, because her doctor placed 8 fertilized eggs inside her uterus.

The Debate Over Commercial Surrogacy Is Dividing Champions of the Sexual Revolution

People believe that once an egg and sperm become an embryo it is essentially beginning its life and is considered a baby. The commodification of children at its best. It turns out, people want blue eyes.
