Protecting Scotland's Future: the Government's Programme for Scotland 2019

As such, work to make our homes and buildings more energy efficient and to transition heating systems to renewable or low carbon sources will be critical. This gives parents greater confidence and ability to get involved in their child's education.

Scottish Marine Protected Areas socioeconomic monitoring

This is central to shaping the kind of country that we want to be. Our universities are becoming more accessible — a greater proportion of students from the most deprived areas entered this year than ever before. Healthier school meals We are making changes that will improve our school food, help tackle childhood obesity and give our children the best start in life.

Monitoring Solutions for the Oil and Gas Industry

Digital technology can help to transform health services, making sure that they meet the needs of people across Scotland and are more accessible.

Review and evaluation of marine spatial planning in the Shetland Islands

This group should review quantitative and qualitative data on at least an annual basis to allow it to assess how effectively care and risk management processes are operating and to gather data for benchmarking purposes.

Protecting Scotland's Future: the Government's Programme for Scotland 2019

We will increase capacity in our health service, increase clinical effectiveness and efficiency and implement new models of care. We have strengthened the management of patients with treatable pre-operative anaemia and trialed Active Clinical Referral Triage.

Energy efficiency: Energy Efficient Scotland

As part of our support for the Scots language, the Scottish Government will ensure its Scots language policy and Action Plan is revised and relaunched this year. Our Tobacco Action Plan focuses on addressing health inequalities and targeting smoking rates in the communities where people find it most difficult to quit. We want to empower hospital managers to make the kinds of changes we need to see to meet our ambition.

Scottish Marine Protected Areas socioeconomic monitoring

There were very few suspected cases of deliberate incursion into MPAs or breaches of management measures.

Monitoring Solutions for the Oil and Gas Industry

Executive Summary Introduction This report provides an assessment of emerging evidence on the socio-economic impacts of Scotland's Marine Protected Areas MPAs.
