## Subcommittee on Energy Legislative Hearing

Those and other issues needed to be addressed urgently and head on. When it comes to drilling offshore, my administration approved more than two permits last year for every new well that the industry started to drill.

## In Defense of Clean Energy

But that's what next year is for. Climate change was a threat multiplier. Limit on Number of Proposals per Organization: There are no restrictions or limits.

## Written testimony of U.S. Secret Service for a House Energy and Commerce Subcommittee on Commerce, Manufacturing, and Trade hearing titled "Protecting Consumer Information: Can Data Breaches Be Prevented?"

What was needed was a specialized, competent and expanded membership forum like the Commission on Sustainable Development, the Economic and Social Council and, first and foremost, the General Assembly. Reasons for Change According to the Government Accountability Office, the return to the taxpayer from OCS production is among the lowest in the world, despite other factors that make the United States a comparatively good place to invest in oil and gas development. The situation required decisive, urgent collective action to mitigate climate change and reduce its consequences to a tolerable level.

## Overnight Energy: John Kerry hits Trump over climate change at hearing

Security was only one of the factors to be considered under the climate change overall agenda, he added, but, in this case, it was well in line with Security Council resolution 1625 2005 to comprehensively address the root causes of armed conflict and political and social crises.

## **The Energy 202: Trump pumped up claims about oil and gas during State of the Union**

Australia was playing its part and had already dedicated billions of dollars to develop, prove and deploy low-emissions technologies throughout the country. The Intergovernmental Panel on Climate Change had already finalized a new report that assessed the current and future impact of global warming and explored opportunities for proactively adapting to them.

## **Energy secretary says pipeline setbacks pose national security issue**

There were no simple answers. Two programs would launch DOE studies into recycling the cars' batteries and integrating EVs into the grid to improve reliability.
