—Ayn Rand Lexicon

Man creates himself The fundamental biological nature of man has not changed since late paleolithic times.

Most Important Animals To Humans (& Ecosystems)

This goal does not have to be inferred—many speeches and books on the subject state explicitly that the ecological crusade is a means to that end. His togetherness towards other creatures characterizes human nature. Introductions of non-native species into new areas have brought about major and permanent changes to the environment over large areas.

—Ayn Rand Lexicon

Admittedly, man often behaves as if he were completely independent of his biological history.

Dubos >> Man's Nature and Man's History

There are several examples of militaries aiding in land management, conservation, and greening of an area. Reprinted with permission of Stein and Day Publishers. Much of this is taken to landfill, but the majority of materials used to make clothes are not , resulting in them breaking down and contaminating soil and water.

Man Needs the Environment

Even today's backpacks have wide belts to help distribute the weight of the load over your lower back and hips. The glory of the coming age must be conceived within the framework of man's nature-of his biological limitations as well as his potentialities. In comparison with agriculture using conventional cultivation, it has been suggested that, because no-till agriculture produces erosion rates much closer to soil production rates, it could provide a foundation for sustainable agriculture.
